# Blackout: The fastest, most accurate way to automate redactions and highlights in Relativity

Manual redactions take time you don't have. Luckily, there's Blackout, from software maker Milyli. Its assisted redaction tool automatically redacts and highlights in documents based on criteria you create. Set your criteria and let Blackout do the rest.

- Auto-redact images and native Excel files

- Create rules and apply them to redact at high-speed

- Ensure privileged information is secure while retaining native documents

- Mass import/export functions via .CSV file

- Quality check with approval, reject, and override options

- Produce redaction logs for court or the opposing counsel
